

## Link List | User Documentation

### Instructions on how to compile install and run LinkList:

#### **Hosting a Room:**

1. Make sure Spotify is not installed
2. Confirm your internet connection is active
3. Install/Open the app
4. Log in with a spotify premium account
5. Click the Host button
6. Pick a Room Name and Number of people
7. Give out Lobby ID found on top of next screen
8. Wait for people to queue music
9. Play music

#### **Joining a Room:**

1. Confirm your internet connection is active
2. Install/Open the app
3. Log in with any spotify account
4. Click Join Button
5. Input Lobby ID given to you by Host
6. Click Search and search for any song available on Spotify
7. Click Queue to add to queue
8. Go back to previous screen to view queued songs

#### **Bugs:**

1. Can't host a room if you have spotify installed on your device
2. Every 5th queue button gets disabled when you click one. It should only disable the one you clicked
3. Rooms don't actually delete
